Professional Summary

Computer Science And Engineering graduate focused on AI Engineering, machine learning, and data science, with hands-on experience building AI-powered applications, predictive models, and data-driven systems. Proficient in Python, Scikit-learn, Pandas, SQL, and FastAPI, with project experience in resume evaluation, intrusion detection, NLP, and predictive analytics. Also experienced in technical documentation, production operations, and data management. Seeking an entry-level AI Engineer or Machine Learning Engineer role.

Technical Skills

Programming: Python, Java, SQL, C

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, EDA, Data Cleaning, Feature Engineering, Statistical Analysis

Machine Learning: Scikit-learn, Regression, Classification, Clustering, Random Forest, Decision Trees, Logistic Regression, Model Evaluation

AI Engineering: LLMs, Prompt Engineering, Structured Outputs, Retrieval-Augmented Generation (RAG), Advanced RAG, RAG Evaluation, AI Agents, Tool Calling, LangGraph, Model Context Protocol (MCP), Multi-Agent Systems

AI Deployment & Reliability: Model Deployment, Fine-Tuning, Observability, Guardrails, AI Security

Backend & Web: FastAPI, Flask, REST APIs, HTML, CSS, JavaScript

Databases & Tools: MySQL, SQL Server, JSON, Git, GitHub, Jupyter Notebook, Google Colab, Power BI, Excel, Docker, Linux

Professional Experience

Production Engineer

SYNCHROTECH EQUIPMENTS PVT. LTD.

July 2026 – Present

Pune, Maharashtra

- Support production operations through technical documentation, material records, and engineering drawing review.
- Coordinate with production teams to track work progress, maintain operational records, and support process improvements.
- Organise production-related data and documentation to improve information accuracy and workflow coordination.

Open-Source Contributor

Elite Coders Winter of Code (ECWoC 2026)

January 2026 – March 2026

Remote

- Contributed to open-source projects involving responsive UI development, frontend styling, and user experience improvements.
- Successfully merged 3 pull requests, collaborating through Git and GitHub workflows, code reviews, and merge conflict resolution.
- Improved application responsiveness and interface consistency through collaborative development. [\[Featured PR\]](#)

Technical Projects

HireMeAI – Resume Builder and Evaluator

Python, FastAPI, Groq API, HTML, CSS, JavaScript, JSON

Aug 2026

[GitHub](#)

- Developed a resume evaluation application that parses candidate resumes and compares skills against job descriptions.
- Integrated an LLM API to generate skill-gap insights, matching feedback, and resume improvement suggestions.
- Built backend APIs and a web interface for resume submission and evaluation.

PreBreach Shield – AI-Based Intrusion Detection System

Python, Scikit-learn, Pandas, NumPy, Flask, MySQL

June 2025 – July 2025

[GitHub](#)

- Contributed to an intrusion detection system designed to identify known and emerging cyber threats using machine learning techniques.

- Supported data preprocessing, exploratory analysis, feature engineering, and frontend development.
- Worked on integrating model outputs with a Flask-based application and MySQL database.

GeoAdhikar – AI-Based Forest Rights Act Monitoring System

September 2025 – October 2025

Python, NLP, Machine Learning, WebGIS, SQL

[GitHub](#)

- Contributed to an AI and WebGIS-based decision support system for monitoring Forest Rights Act implementation.
- Worked on document digitisation, land classification, and integration of geospatial information for decision support.
- Project selected as a waiting-list finalist in Smart India Hackathon 2025.

Heart Disease Prediction Using Machine Learning

October 2024 – November 2024

Python, Scikit-learn, Pandas, NumPy, Matplotlib

[GitHub](#)

- Developed a classification model using clinical attributes to predict the likelihood of heart disease.
- Applied data preprocessing, exploratory data analysis, and model evaluation using Logistic Regression and Decision Tree algorithms.
- Presented the research at NCCCI 2025.

Sentinel-R-V4 – Multitasking Autonomous Rover

IHMMC 2026

[View Project](#)

- Developed a multitasking autonomous rover as part of a team project, integrating robotics and embedded systems.
- Secured **1st Runner-Up** at (International Innovative Hardware Model Making Competition) IHMMC 2026.

VAYU-SETU – Real-Time Wireless Telemetry Bridge

Initium 11.0

[Drive Profile](#)

- Designed a wireless telemetry bridge for real-time communication and data transmission in a technical project.
- Secured **3rd Place** at Initium 11.0, organised by IEST Shibpur.

Education

B.Tech in Computer Science and Engineering

2022 – 2026

Asansol Engineering College, MAKAUT

CGPA: 7.18/10

Academic focus: Internet of Things, Cybersecurity And Blockchain & Technology

Class XII – Science

2022

Eastern Railway Inter College, Jamalpur, Bihar

65.4%

Class X

2020

Eastern Railway Inter College, Jamalpur, Bihar

69.6%

Certifications

- Master Data Science, AI, and Machine Learning – Udemy, 2026 [\[Credential\]](#)
- Advanced Power BI: Expert Data Analysis and Visualization – Udemy, 2026 [\[Credential\]](#)
- Introduction to Data Analysis using Microsoft Excel – Coursera, 2026 [\[Credential\]](#)
- Google AI Essentials – Google, 2025

Achievements & Contributions

- **1st Runner-Up – IHMMC 2026:** Recognised for Sentinel-R-V4, a multitasking autonomous rover project.
- **3rd Place – Initium 11.0, IEST Shibpur:** Awarded for VAYU-SETU, a real-time wireless telemetry bridge.
- **Smart India Hackathon 2025:** Waiting-list finalist for GeoAdhikar (SIH25108).
- **Open-Source Contributor – Elite Coders Winter of Code 2026:** Successfully merged 3 pull requests involving responsive UI development, styling, and collaborative Git workflows. [\[Featured PR\]](#)
- **Google Cloud Gen AI Study Jams:** Recognised among the Top 60 participants twice.
